(EN) What happens if I can not register for the appointment and I do it later? - UV registration - FAQS

If you are first registered, you lose the preference that gives you the access note and you can lose your seat if you do not come before the call of the corresponding waiting list.

If you are late and you are a second or later registration, there is no problem, you can register later, but you have to take into account that you lose the preference that you had assigned by the registration appointment regarding shift / schedule (you can find closed groups).
