(EN) Students who does not see their subjects

I have done the registration, group changes, enrollment expansion, etc.

Check the registration summary in Virtual Secretary. If you do not have an assigned group, contact the Center's Secretary.

Keep in mind that the update in Virtual Classroom is done during the night.

Is the course hidden?

Sometimes, users have unintentionally hidden a course by clicking on the 'eye' icon.
If there is a hidden course, a link "Manage hidden courses" appears at the end of the course list.

Click on the link and search for all the courses that appear with the 'crossed-out eye' icon. Only have to click on the icon.

The list of courses appears and disappears.

This is because you have minimized the block "General view of courses". You can see the minimized button on the left side of the screen.

Wrong selection of academic course.
You do not see subjects in the mobile application.

- Check that you have no hidden courses.
- Try clicking on the update icon in the shape of a curved arrow that appears in the upper right part of the screen.
