(EN) Modality 5: Direct enrollment by time groups

Groups and subgroups: Selection of the timetable of subjects.

The enrollment process for compulsory groupings is as follows:

- Choose the set of subjects of the course you want to enroll and click on register.
- Then you have to select the time set that you like the most.
- It is possible that there is not a set of hours with places for all the selected subjects, which is why the process is iterative.
- You will see all those time groups with maximum coincidence.
- Once one is selected, a new screen will appear with the maximum number of other subjects, and so on until the enrollment is complete.
- If there is a place for all your subjects in a single time group, the iterative process will consist of a single step.
- If no hourly set appears, or at the end there is a subject in which no time set appears:
  - Try to eliminate some subject and try to get enrolled as many as possible.
  - Contact and inform your center of the situation. It is possible that they can offer more places and you can finish your registration.
- You can choose as many time groups as you want.
